

IV. Miscellaneous Data, Reports, and Media

Ohio's Energy Efficiency Resource Standard: Impacts on the Ohio Wholesale Electricity Market and Benefits to the State (April 30, 2013 Research report)

<http://aceee.org/research-report/e138>

“In this analysis, we quantify the benefits that would accrue through the full implementation of the energy efficiency resource standard (EERS) in Ohio through 2020. Our analysis shows that there is an inextricable link between Ohio's energy policy and its economic health and that continuing Ohio's EERS could save customers a total of almost \$5.6 billion in avoided energy expenditures and reduced wholesale energy and capacity prices.”

“Ohio's Electricity Future: Assessment of Context and Options” by Paul J. Hibbard and Andrea M. Okie of Analysis Group

http://www.analysisgroup.com/uploadedfiles/content/insights/publishing/ohio_electricity_future_report_2015_april.pdf

This is a 2015 report that reviews current challenges facing Ohio with respect to electricity markets, regulation, and policy, and an evaluation of potential options for moving forward. Funded by Advanced Energy Economy (AEE).
